Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Padfolio

"Padfolio" is the manufacturer's way of saying this is a portfolio-lite. Think of it as the notebook for vegan executives avoiding even faux leather. Made of black vinyl with discreet red stitching, and a letter-size pad inside. Has a 5-section translucent vinyl accordion file and (2) pockets each for business cards or CD-ROM discs. Everything closes with hook-and-loop tabs.

Suspend-A-Memento

Call it a tchotchke frame, a way to suspend a three-dimensional object inside a matte-finish plastic frame so it appears to float in mid-air. Our each is a 2-pack of 8" x 6" black frames with rounded corners and two layers of a thick, stretchy plastic film. Snap-off corners let you separate front and back, place the object (that you supply) between the two, and snap them back together. The films stretch to conform to the trinket and suspend it in the center, or wherever you put it. It should take objects up to 3" thick, or about the size of a baseball. The assembled frame itself is 1-1/4" thick. Mounts vertically or horizontally, or can stand up by itself.

Solitaire-Size Cards

Who knew there were official sizes to playing cards? Well, we did, actually. These are the small, solitaire size, 1-3/4" wide x 2-5/8" tall, Tally-Ho® cards (look for the joker with the whip!) in a linoid finish with the blue fan-circle back. Bonus info: those 2-1/2" wide cards are poker size, the 2-1/4" wide ones are bridge size. You're welcome.

Red & Blue "Inversion" Puzzle

Imagine a cube puzzle with 19 smaller cubes with red and blue sides that slide back and forth until you can figure out how to make the sides all one color, or reveal red corners or blue bands, or one of the other 351 trillion combinations, none of which an otherwise quite resourceful copywriter can begin to understand. Measures 2-1/4" cubed. (The puzzle, not the copywriter.)

42109 Inversion Puzzle \$5.75/each

Put a little fun in your rainy days with these Wiper Glasses. The large, round and fashion-forward clear plastic lenses (sorry—no prescription lenses available) are set in alarming blue frames. The wipers are driven by (4) button-cell batteries (included!) and there are flashing red & blue LEDs on the nose bridge to make these specs even more attractive. Give Someone The Bird

It's the Gold-Beaked Kooshy Penbird. The Penbird is 8-1/2" tall and looks like a one-legged cross between the roadrunner and Jar Jar Binks, with kooshy-ball feathers. Incredibubbles!

We love these! You're going to love these! Your kids are going to love these! Hundreds of clear marble-sized bubbles can cover the floor, cling to the sides of furniture, land on your arm. They float enchantingly, rising on air currents you can't even feel. After a few seconds, the bubbles are hard enough to catch or stack. Some will still be perched in out-of-the-way spots a day later. Touchabubbles goop, thicker than the bubble-blowing liquid you're familiar with, comes in a 4" plastic test tube with a wand built into the cap, and a clip on the side so you can carry it in a shirt pocket. The goop is non-toxic, but it tastes really bad, and you probably won't want these landing on expensive tabletops, so kids under 8 should have adult help with them. They should be sharing the fun anyway! **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Talk Like A Munchkin

Talk like a munchkin and save the world's helium supply at the same time with extremely cool digital audio recorder with a pitch-change wheel for playback. Also distorts in the slowed down, ogre-ish direction. Approx (6) seconds recording time, but you'll be amazed how much you can say in that time, which is longer than helium lasts anyway. Measures 4" x 2-1/2" x 3/4" thick and includes a replaceable coin-cell battery. **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

More Cowbell! More!

Whether you've got a band or a band of cows, everyone knows that everything needs more cowbell. We've got a bunch in red, black and white in the traditional shape, about 3" tall, not even counting the handles, and some red and white ones in the more squat, Swiss-ish style. We'll pick (2) different bells to send you (our choice of color and shape). Better get enough for home, dashboard and office.

The Self-Winding Top

Hold the little bracket on top, pull the string and let go, and this toy top spins like a dervish and rewinds the string automatically by the magic of physics, saving hours of exhausting string-winding. Maybe it has that classic-toy feel because it uses no fossil fuel resources at all to do it! This colorful toy that even hums while it works is 3-1/2" tall x 2-3/8" dia.

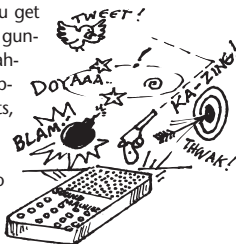

94292 Self-Winding Top

Digitally recorded, in a 4" x 2-3/8" x 7/8" box with a 1-1/4" dia speaker. It's small enough to carry in a pocket so you can be the life of the elevator! **ΔWARNING:** CHOKING HAZARD-Small Parts. Back To Basics

It could have been called an Alabama Buzzer after Alabama Vest, the man who invented it. Or a Clegghorn, after Thaddeus Von Clegg, the clock master who fabricated the first one. But the hand-crafted 4-3/4" long steel instrument was a simple amusement, and the 1840s were a simple time. So it's simply a kazoo. **ΔWARNING:** CHOKING HAZARD-Small Parts. Teeth With Feet

Wind them up and they chatter while they walk around, these teeth with feet. A perennial favorite, updated. These teeth are the mini version, 1-5/8" x 1-1/4" on a pair of 1-1/2" wide feet. You'll get red gums, white teeth and pink feet (just like you!) or pink gums, white teeth and green feet, which makes for a nice change. Impolite or not, we pick the teeth.

Screeching Monkey Superhero

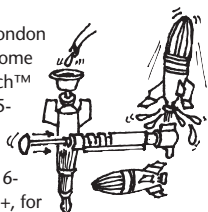

Look! Up in the sky! It's a screeching flying monkey to the rescue! And at a screechingly low price. Our hero is an 11" long stuffed monkey in superhero togs (a cape, and maybe a mask or hood, depending on his sartorial whim). Put two fingers in the little pockets on his paws, pull his bungee arms back, and let him go. He'll fly a good 25 feet or more, issuing hideous monkey screeches all the while, faster than a flying nun and able to brighten up a day in the office in a single bound. **ΔWARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Parachuting Screaming Monkey

The biggest improvement ever in flying screaming monkey technology. Red, green and blue LEDs flash, strobe or oscillate at your discretion and light up the walls. Best, like so many other things, in a dark room. Give one to your favorite wizard.

Globular Copter

Called a robotic UFO, this flying bot is officially, per our flying toy division, "extremely cool." The 8" dia black wire frame supports a central set of double helicopter blades. Powered by an internal lithium-ion battery, which charges via a USB cable from an infrared dual joystick controller. The controller takes (6) "AA"s that you add. Control range is approx 30 feet and the flight is remarkably stable, but then what UFOs aren't? Has (3) channels, so you can buy a trio and race them.

Woblongs Don't Wobble

Weebles wobble but the double-wing Woblong™ just flies through the air with the greatest of ease. The interlocking ovals give it twice the lift of your basic pie-plate flier (says so right on the package, so it has to be true) and you can catch it on your arm cuz it's got a big hole in the middle.

Original Slinky®

Does anyone need to be told what a Slinky(tm) toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slink it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline. Believe us, no childhood (or adulthood) is complete without an original stainless steel Slinky(tm). It was hard for us to find it, but we are glad we did. You should be too. **⚠WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

The Electric Hamsters

The Electric Hamsters may have been Buddy Holly's first band, but these are the Hurry-Up Hamsters™, extremely cute motorized mammals that follow their little pink noses while they motor around your desk or floor, reversing periodically while emitting a strangely endearing squeaky monologue. All you add is (2) "AAA"s and a little love. Like most hamsters, they come in two-tone light brown, dark brown or black, over white. We'll pick one, shall we? And you can order as many as you like—electric hamsters are no longer an endangered species. **⚠WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Nothing says motoring fun like a zombie on the dashboard. He's green, he's quivering, he's undead, and he sticks to your dash! We're especially fond of the spring-attached head and arms which shake just like a real zombie. About 5-5/8" tall with a partially exposed brain. **⚠WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **⚠WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **⚠WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Wow! Double Wow!

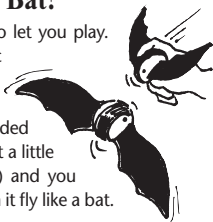

This is Philip's new favorite toy, since he blasted a rocket so high over our parking lot that he lost sight of it (the rocket, not the parking lot). The Air Burst™ Rocket system has a 26" tall, air-powered tri-pod launcher made of plastic and rigid foam. A 65" long air hose connects it to any stand-up bike pump. After a few pumps, the air pressure bursts a replaceable booster disc in the launcher and sends a 10" x 3/4" dia rocket 250 to 1000 feet into the air. Wow! The system includes the launcher, (2) rockets, and (60) boosters (two different weights). Sending rockets out of sight, even if they usually come straight back down, is an ingenious play for selling extra rockets. Our each is a pack of (2). And having extra rockets is an ingenious play for selling extra booster discs. Our each is another bag of (60). No bicycle pump? The 18" black Tech Team pump blew majestically through a "double bozon" booster for us! It creates up to 120 lbs of pressure while most pumps will only generate 80 psi. It fits a Schrader (American) valve. Warning: The Air Burst™ Rocket is for ages 10 and up, with adult supervision. Don't let us catch you out there without a kid! **⚠WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Still extremely cool, however, in this kit version. Bone Up On Anatomy

You're not going to blow money on an actual human skeleton, are you? Consider that for a tenth of the price you can get an anatomically accurate skeleton done in plastic. This model is male (judging by the hips) and has many articulated joints—jaw, shoulder, knee, etc. Its small size (33") makes it practical for classroom use, since it can be passed around the room. Other nice touches include discrete neck vertebrae, a sectioned skull, and very little "flash" from the plastic molds. It also comes with a metal display stand, weighted at the bottom to prevent spills. Yes, some concessions had to be made because of the size and price, but this is still an invaluable teaching tool, and quite a nice decoration for those with morbid minds.

Fantastic Ant Farm

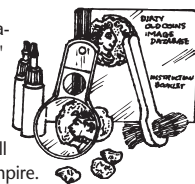

Ant farming has been reborn since NASA got interested in insectaries and Fascinations® started manufacturing AntWorks™. What used to be a dark, earthen ant farm is now a curvilinear plastic habitat containing gel the color of a Caribbean dive site. The clear turquoise gel is the food, water and housing medium of the insects, which you may capture locally, or order via mail. We ordered ours, the better to avoid militant army or fire ants or feuding factions, and it worked out just fine. The ants dig relentlessly for weeks, and you can easily observe them constructing and connecting a maze of tunnels. It's utterly fascinating. The 6" x 5-1/2" x 1-1/4" thick space-age habitat comes with an educational booklet, simple instructions (there's practically nothing to do), the address of the ant dealer - and a tight lid.

Killer Magnet

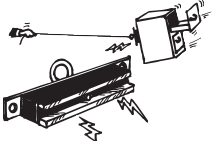

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 1/2" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

38694 Killer Magnet \$14.50/each

A Real Grabber

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eyehook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

91949 Pick-Up Bar Magnet \$10.95/each

Shapely Ceramic Magnets

These evocative ceramic magnets are approx 1-1/4" to across with approx a 1/2 to 3/4-lb pull. Polarized on one face only (the one with the divot). Great for showing attract/repel qualities at say, a science fair. You pick the triangle, five-pointed star or heart shape.

Our each is 2 lbs.

93651 2lbs Assorted Magnets \$7.85/each

A Lot Of Pull

Pick up this 1-3/4" x 7/8" x 3/8" ceramic pick-up magnet while we still have it. It's in a heavy metal housing and has a stationary metal hoop, about 1/2" i.d., on top. The manufacturer tells us the magnet will grab up to 30 lbs of metal, and while Pat wouldn't bet on anything over 20 lbs, it's still very strong. Especially if you're going to dangle it on the end of a cord to gather spilled nails or to fish your keys out of the lake/pond/sewer/drain!

91859 Pick-Up Magnet \$2.95/each

Small But Rare

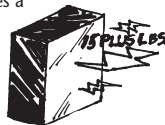

Very nice little rare-earth magnet, 3/8" dia x 1/16" thick. Disk-shaped, plated, with good pull for its size. Perfect for a latch on a storage box or cabinet door when paired with a small steel screw or brad.

41355 Chunky Magnet \$6.95/pkg(2)

Plain Donuts

Can't beat a classic. These uncoated ceramic donut magnets have a 1-lb pull, which makes them dandy for classroom or refrigerator use. They measure 1-1/4" dia x 3/8" ID x 3/16" thick and are polarized on the faces. You get a wrapped roll of 29 donuts.

40007 Uncoated Magnets \$5.95/pkg(29)

Singing Coal?

What we have here are coal-colored asymmetric hunks of ceramic magnets, not unlike the "singing magnets" that you toss up to watch them grab each other and make ringing sounds. Except these are black and lumpy and are called Cracklin' Coal. Fun, though, and useful as individual magnets, each resembling a misshapen licorice jelly bean roughly 3/4" to 1" across. You get (2) packages with (4) in each package. **WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

42071 Cracklin' Coal \$3.95/pkg(2)

Mercury-Free

Fearful of language barriers, some folks get anxious when they travel internationally. Not this fine red-alcohol glass thermometer. Whether its travels take it to Britannia or Madagascar, Appalachia or Moscow, it's always ready to tell the temperature in the local tongue. Working stateside? Your Nose Is Running

This nose only runs when you punch it. Actually a little squeeze will do, and then it dispenses shampoo or shower gel (or whatever you fill it with) right into your hand. Even larger than Charles de Gaulle's nose, it measures 7-1/8" long x 5" wide at the nostrils. Mounts with a keyed slot or suction cups on the back and comes with a small bottle of appropriately green shower gel. Could also mount above your kitchen sink if you'd like to share the fun. (Green ketchup anyone?)

Swingin' Desk Toy

Newtonian demonstrator for science teachers. Mindless play for the rest of us. These are shiny, nicely balanced, high-performance examples of the classic Newton's Cradle - a ball on one end of a row of (5) suspended, barely touching balls swings into the others, and the ball at the opposite end reacts to the collision. The 11/16" dia balls in the small version (all-metal frame 6-1/2" high x 4" x 4-1/4") will collide about 30 times. The 7/8" dia balls in the large version (metal frame 5-1/4" high x 4" x 6", with a wooden base) will collide about 100 times. Awesome. Even more awesome that we paid someone to count the bounces just for you! (Unpacking note: Less awesome if you just yank it out by the suspension lines and pull a couple of balls loose. Be gentle.) **⚠WARNING: CHOKING HAZARD**-This toy contains a small ball. Not for children under 3 yrs.

Moving Sand Art

Black and white sand in a viscous colored fluid. The sand and fluid are between 5-1/2" wide x 3-1/2" high panes of glass, framed on a gimbaled stand. Flip the panel and watch the sand swirl and eddy into endlessly new pictures of dunes, drifts, mountains or moonscapes, depending on your imagination and the pattern they form. The mix of black and white creates a definite third dimension to the images. They come in assorted colored plastic frames (our choice) and are pretty neat, as these things go.

The Doorway Of Suzie Wong

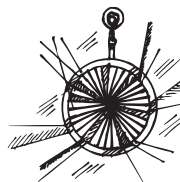

This isn't the Cold War metaphorical bamboo curtain, it's an actual bamboo door curtain, handmade in Vietnam of 2-1/4" long x 1/4" dia sections of actual bamboo in a natural color. We like it for productions of Flower Drum Song, for turning your house into a Graham Greene novel, or just for hearing that cool rattle of wood against wood as you walk through it. Measures 78-3/4" tall x 35-1/2" wide, with a 7/8" X 1" wooden bracket ready to hang by four built-in wire loops.

Swing Time

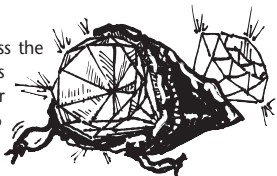

The battery killed the pendulum--ask any grandfather. Well, the back-and-forth is back in this space-saving battery-operated wall clock with a lovely hypnotic pendulum. Measures 10" long x 5-3/4" with a 4-1/2" dia face and a second 2-5/8" dia window below it to watch the pendulum swing like England used to. Runs on (1) "AA" battery, not included because we already included the pendulum and we can't do everything.

The Renaissance Is Here Again

You can't keep a good barometer down, and this one, originally designed in the mid-17th century by Evangelista Torricelli (who sounds like a lady but was a dude) and perfected by Goethe (yes, that Goethe) is worth returning to. Stands 7-3/8" tall on a 3" dia base and is basically a 4" dia globe. You'll need cool and warmed distilled water, a little food coloring, and the ability to follow the directions, after which it will tell you the barometric pressure, just like it did for Goethe. Mighty pretty to look at, too.

Radiometer

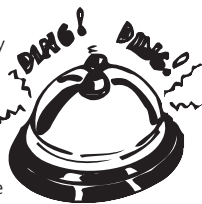

Another oldie but goodie. 5" high evacuated clear glass stand 3" in diameter at the top. A four bladed vane is balanced on a needle inside the sphere. Because opposite surfaces of the vanes are black and white, incident radiant energy is absorbed or reflected to a different degree. The result is a spinning vane. The brighter the light, the faster it spins. Simple, but compelling. Brief explanatory instruction sheet included.

An Atomic Clock, Eh?

Recognize this digital atomic clock? You must be hanging around hospitals and other government institutions up in Canada, because this came from their actual supplier. Accurate to a fault and visible across a very large room, this giant digital clock refreshes and resets the exact time each night and is 16-1/2" wide x 10-1/2" tall x just 1-3/4" thick, with a clean, brushed-aluminum-look plastic frame. Displays time (digital LCD h/m/s, with h/m being 4" tall), time zone (select any of 6 North American zones), indoor temperature, day and date. It has 12- or 24-hour settings, choice of C or F temps, and mounts on a wall or sits on a built-in stand. Runs on (3) "C" batteries that come with it.

We don't like to brag, but it's tough not to in a case like this. This is a wonderful pen-shaped laser pointer, 5-1/4" long, flat black or silver with gold pocket clip and head. It throws a red point a loong way (we've thrown it two city blocks, and it would've gone farther, but buildings got in the way). And what are we so proud of? We've seen a very similar item—not identical, mind you, but essentially the same—in one of those glossy, toys-for-grown-men catalogs. Their price? \$20! Green Laser Par Excellence!

Da Mare could use this to point out cracks in the infrastructure at Wrigley Field. You, having a forgiving nature, will resist the urge to point out cracks in da mayor's infrastructure. You will, of course, use it to point out chimney cracks to the tuck-pointer, a cracked limb to the tree-trimmer, and the crack in your profit picture during a slide presentation. You can do all that and much, much more with the bright light from this 5mW green laser pointer. It's an unbelievable tool. If you need a laser pointer that seems to go on forever and is so strong that you can actually see the beam in the dark, it will be the best low-cost investment you ever made. Or the coolest high-end toy. The 532nm Class IIIa light is 5-5/8" long x 1/2" dia, with (2) "AAA" batteries (included), a momentary-on switch, pocket clip, and case. Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" The E-Library

We're thinking you'd need about 375 feet of bookshelves to store the books in this digital library, or 500 briefcases to carry them with you on vacation. Instead, this 1" x 1-1/2" x 3/8" thick plug-in drive, cleverly shaped like a teensy book, has the text of 3,000 classics for less than half a cent each, including Huckleberry Finn, Black Beauty, Great Expectations, all of Sherlock Holmes, a bunch of Charles Dickens and thousands of others in standard E-book format. All you need is a USB port and Windows 7, XP, SP2, or Vista (sorry, no Mac version). And be careful, it's not edit-protected, so hit the wrong key in A Tale of Two Cities and you could erase the French Revolution.

ALL Things To ALL People

This deluxe ABS storage case is called a Store-It-ALL, and it does. But it could be called a Carry-It-ALL, for the sturdy handle and locking clasp, or it could be called a See-It-ALL, for its translucent lid. Or a Fits-It-ALL, for the removable dividers that let you configure it with any number of compartments from 5 to 26. Remember the old times when you ate your popcorn out of these 6-1/4" tall x 3-1/2" square (at the top) tapered red and white popcorn containers, from the era when a "small" wasn't 128 ounces? Back then, the popcorn tasted better, too, because the cardboard boxes said Hot, Fresh, Delicious right on the side. Monkey Dishes

Little bowls like these are called monkey dishes in the restaurant business. Doesn't pay to ask why, we think, but they're extremely handy. These are stainless steel, 4-1/2" dia x 1-1/2" deep. They're marked "Pet Bowl," but wouldn't work for anything over kitten size. We'd use 'em for peas, paints, pickles, peanuts, paste, prune pits, like that. You run out of p's, you could use them for ketchup, mustard or mayonnaise.

Lookers!

The kids need presents for all the grandmas and great-aunts? You volunteer at the nursing home and need token gifts for your L-O-LS? And your eyes aren't so good, either? Our each is really half a dozen pretty little magnifiers with round lenses and fancy handles. The handles are silver-bright (hard to believe they're aluminum) and all different. Each has a discreet hole in the tip for a jump ring so it could be worn on a necklace - but it would look just as pretty on a desk. The overall length of the (6) magnifiers varies from about 3-3/4" to 5", the lenses from 1-1/4" to 1-3/4" dia. All are approx 2X magnification. Mary Ann's pick of the month.

A Pyramid of Prisms

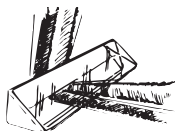

Polished glass equilateral prisms. Equilateral because each edge of the end is the same length, 32mm. Thus, as all you geometry students know, each of the angles is also the same, 60 degrees. These are school grade and are fine for decorative and demonstration. They do a nice job of refracting light to produce a nice rainbow-like spectrum, but are definitely not up to instrumentation standards. The missing dimension, length, is shown below.

Pillow Talk

You get a pair of 1-1/4" dia, 36-ohm speakers at the end of a 5-foot cord with a 1/8" mini-plug at the other end. They're similar to headphones but without the holder and the foam pads, and the street cred you get when you hang headphones around your neck. These speakers are very soft spoken, but then they're designed to be used in your pillow, because wearing actual headphones in bed is just plain awkward--especially when you roll over.

From The Golden Past

This Motorola Golden Voice speaker is vintage, we're just not sure what vintage. Based on its shape, we think it's from a car radio. What we know for sure is that it has a 4-Ohm impedance, measures 4" x 10" x 2" deep and is mounted on particle board that measures 4-3/8" x 11-1/4" with mounting tabs on the long ends. Voice coil is 1-1/8" and it has a pair of quick-disconnect terminals. No wattage rating but our vintage speaker expert (old, but still working) says it'll be OK for up to 10W or so. Made right here in the USA, so you know it's vintage.

Fallout Shelter Sign

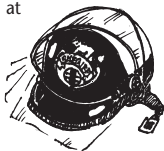

They're Back! Those of a certain age will remember being taught to crouch under their school desks in case of nuclear attack. Shortly thereafter, the gov't, in its infinite wisdom zoomed about the thecityscape plastering black and yellow signs on buildings with basements to designate them as fallout shelters wherein it stored cans of water and radiation meters which were so insensitive that any reading could only mean the past tense of crispiness. We have a quantity of these signs, brand new in the sense that they have never been plastered, but antique in the sense that they are the Fifties originals. 10" x 14", 25 ga. galvanized steel. They have a black base coat on the front over sprayed with orange/yellow reflective paint in the familiar design rendered nearby by our faithful artist. This is a true collector's item fetching \$50 and up in antique stores! A tasteful addition to even the dullest basement hangout.

One-size (large-ish) but adjustable with a strap across the back of the head (like a military helmet liner) and an adjustable chin strap. Wave The Orange Flag

Frankly, we don't know what waving an orangish flag means, but we suspect it's a way to signal for more juice. We've got a bunch of them marked on the sleeve with mentions of Bonn and Bund, so we're thinking German army, but we really like these for pep squads at schools where one of their colors is "traffic gold." Flag is 16" square in hemmed cotton with a couple of white tie-ons at the bottom, on a 31" long x 13/16" dia wooden dowel with a couple of small holes, probably for the ties.

I Will Survive...

You will survive, too, just like Gloria Gaynor, and in the woods, even. But only if you have this U.S. Army manual, cleverly titled: SURVIVAL, Department of the Army Field Manual FM21-76. It's 287 heavily illustrated pages of techniques for staying alive (add your own BeeGee jokes here) including orientation; food & cooking; fire- and shelter-making; rafts; animal, insect and plant recognition; and much more. This is the 1970 edition, but staying alive in the woods hasn't changed a whole lot since then. In soft-cover.

A Snarl of Magnet Wire

One of those sharpie East Coast outfits pulled a fast one on this poor naive Midwestern dealer. The result is we have a pile of exotic coated magnet wire. The coatings and colors vary widely, as does the gauge of the wire. With a couple of exceptions there isn't enough of any one kind among the hundreds in the pile to list separately. So we are offering an assortment and you get whatever we grab. Either way you will get a terrific value, particularly if you have an exotic application and get just what you need. Even if you are just making a garden variety coil or electro-magnet you will still find the prices are very good. So go ahead, profit from our misfortune. We are glad to be of service. Sigh.

Ratchety Wrench

Call it the crescent wrench made easy. The Adjustable Rapid Wrench™ is a 10" crescent wrench with a padded handle and a special tooth in the jaw so it ratchets back or forward, which means you don't have to keep taking it off the nut and putting it back on while it keeps getting looser and not fitting so you just have to adjust it all over again, which drives us nuts, too, or did until now. Jaws open to 1-1/2". Plus you get a bonus 4-draw, 18-1/2" long swivel-head magnetic pick-up tool, for when you do the last few turns with your fingers and drop the bolt.

One Socket Fits All

Unlike those hotel-room bathrobes, this clever devil of a chrome vanadium universal socket really does fit all, at least nuts between 3/8" and 1" along with sundry other non-nut shapes that you might need to turn, like cup hooks and wing-nuts. Fits a 3/8" driver and measures 2-1/2" long x 1-1/2" dia.

Chrome Vanadium Driver Set

Chrome vanadium steel is strong, tough and resists wear and fatigue, unlike the rest of us. Good stuff for making a driver/bit set like this one from SmartPro Tools® that has 44 pieces, including a full range of Phillips, Pozi, slotted, hex, star and tamper-proof star bits; (6) sockets; (3) 5" double extension bits, a universal holder; pivoting 20° universal adapter; socket adapter; bit adapter; 5-1/4" ratcheting driver with a clutch chuck; and a carrying case.

Gently, Gently

When just a delicate squeeze is all you want, you'll need these nylon-jawed flat nose pliers. Measure 5-3/8" long with 1/2" wide x 1" long jaws and rubber-coated handles. Crafter and jeweler must-haves.

Ecdysiast

AKA automatic stripper. Sorry folks, but this one strips insulation to reveal wire, not flesh. Which may still give you a charge, depending upon your hookup!! 6-1/2" Long with pliers type grip and automatic self-adjustment to strip wires from 0.2 to 6mm without damaging the wire says the manufacturer. We recommend use on 18 GA stranded, 22 GA solid wire or heavier as it will cut the wire of lighter weights. A second jaw is a cable cutter. Brand new, made in China. And very handy too, if you are doing anything with wiring.

23273 Wire Stripper \$1.95/each

Attach Anything!

You need this. Anybody who's ever made a third trip to the hardware store on the same day needs this. The (100) -- count 'em, (100) -- chrome vanadium driver and bit attachments include slotted, Phillips, square (Robertson) head, torx, hex and 12-point bits, plus security Phillips, torx and hex, and (4) different driver adapters (one of which, a super-cute cup-hook driver, has us oddly excited). They're all in a flip-top plastic case. How come it's surplus? If you turn it upside down and shake it, some of the bits fall out of their little size-marked slots. So don't do that. Or stick a thin sheet of foam inside it and all will be well.

92581 100-Pc Bit Set \$12.95/each

Stubby, 'Kay?

Longest Long-Nose Pliers?

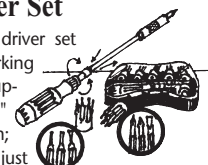

These would be standard nickel-plated locking pliers (with the vice-like grip) with serrated 1-1/2" jaws, except that they're 15" long. Think stuff you can't reach and stuff too hot to reach too close to. And if you're making a steel sculpture of a goose in flight, this is the front end. Really.

Dwarf Hammer

Even Grumpy would be happy if he had this very cool, stub-handled claw hammer to work with. It packs the punch of a 10-oz hammer, but is only 6" long overall, so it fits nicely in a sleepy cottage in the forest - or a studio apartment, emergency toolbox, or kitchen drawer. It's ideal for crafts, picture hanging and other dokey little jobs, but we wouldn't be bashful about using it for any hammer-type task. The manufacturer did doc the size of the drop-forged steel head a little (4-1/2" head to claw), but they gave it a heavy-duty frame, a contoured rubber grip, and a small magnet in the head for starting brads and nails. And we gave it a price that's nothing to sneeze at.

The 1-1/2 quart plastic pail has a half-circle profile with the flat side gently curved to hug your gently curved tummy. It slips into a pocket on the front of the polyester apron that comes with it, and has a spill-resistant lip on the front for wiping the brush, and for keeping the paint inside when you forget and bend over. Also makes a nice hands-free snack holder.

Soldering Gun in a Jar

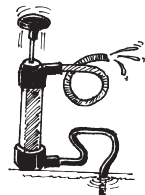

Wire glue—the solution when you can't find the soldering iron, don't want to bother, are out in the woods, don't quite trust a fifth-grader with a hot gun, can't reach the connection with both hands, whatever. This stuff conducts low voltage AC and DC circuits in a permanent bond and is easy to use. Our high-tech support group suggests that a toothpick is a good way to apply it. Cures overnight. Our each is a 0.3 oz/9ml jar.

92838 Wire Glue \$4.95/each
